PROFILE SUMMARY

Aspiring **Software Development Engineer** with strong proficiency in **Java, Data Structures & Algorithms, OOPs, DBMS, and full-stack web development**. Built and scaled a **full stack e-commerce platform**, focusing on clean backend architecture, API design, and performance. Comfortable with problem-solving under constraints, system trade off, and adapting quickly to new technologies including AI- assisted workflows.

EDUCATION

IPU University, Dr. Akhilesh Das Gupta Institute of Professional Studies

Bachelor of technology (Btech)

CGPA: 9.0

Class 12th

Happy Ever Green Senior Secondary School

Percentage: 88.8 %

SKILLS

Programming Languages: Java, JavaScript, Python

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOPs), DBMS, SQL

Web Development: React.js, Node.js, Express.js, Rest APIs, JWT, HTML, CSS

Databases: MongoDB, MySQL

Tools: Git, VS Code, Postman

PROJECT

Scalable Interior Solutions Management System

Tech Stack: Mern Stack (MongoDB, Express.js, React.js, Node.js), JWT Authentication

- Engineered a full-stack e-commerce and order management system for interior services.
- Designed modular REST API architecture for product, order and admin management.
- Implemented role-based authentication and protect admin routes using JWT middleware.
- Built responsive UI with CSS media queries ensuring cross-device compatibility.
- Managed state using React Context API and implemented persistent cart functionality.
- Deployed application using frontend, Render and MongoDB Atlas.

Responsive Portfolio

- Built a responsive portfolio website to showcase personal projects using HTML, CSS, and JavaScript.
- Focused on clean UI design, cross-device compatibility, and reusable components.

EXPERIENCE

Web Development Intern – CodSoft

- Developed responsive and reusable UI components using HTML, CSS, and JavaScript, following mobile-first design principles
- Enhanced UI consistency and code reusability across multiple pages by modularizing components
- Collaborated in a remote team environment, utilizing Git for version control and code collaboration

ACHIEVEMENTS

- Solved 200+ DSA problems on LeetCode focusing on arrays, strings, recursion, trees, and hashing
